

Safety Guidelines for Return to Campus

- Our fall academic calendar will remain the same although delivery mode may change at any time due to circumstances of the COVID pandemic.
- Classes will be offered face-to-face, hybrid and online this fall.
- Students, faculty and staff will be **REQUIRED** to wear facial coverings/masks when inside any campus academic or administrative building including the classrooms, hallways and bathrooms.
- We are reducing the capacity of our classrooms to increase the social distance as close to 6 feet apart as possible.
- Classrooms are being set with students facing one direction.
- Excess furniture is either being removed or clearly marked as off limits.
- Each classroom will be marked either on the floor or on the permanent fixture to clearly communicate where it needs to remain for proper distancing.
- Signage will be used to clearly communicate available and unavailable seating.
- All classrooms will have ODH *6' Social Distancing* and *Mask Wearing* signage posted.
- Facilities have been clearly marked with key message reminder posters, one-way stair directional signs, maximum occupancy signs for elevators and restrooms, and all entrance doors have distancing and mask wearing signage.
- Lobby areas will be adjusted with the removal of extra furniture and/or marked acceptable seating.
- Hand sanitizer stations have been added to all facilities.

June 25, 2020 Update

- Cleaners are being assigned for touch point cleaning during the day. This includes hitting high and medium touch points routinely in the high traffic areas while students are in session along with disinfecting restrooms and common areas multiple times per day with an EPA registered disinfectant. (Spartan RTU TB-Cide Quat)
- Cleaners will also be performing a deep, comprehensive disinfection clean in all classrooms on a nightly basis. This includes a full vacuum from wall to wall, full mop on all classrooms, as well as using Electrostatic Sprayers and/or Airless Sprayers to disinfect Classrooms, Common Areas, etc.
- We are considering GermStop Disinfection Service with an Antimicrobial. This service includes a misted application of antimicrobial by certified trained technicians to high and medium touch points, and provides protection from germs on surfaces for 30 days.
- Enhanced custodial training procedures for front line custodians have been employed to emphasize disinfection processes along with the importance of pre-cleaning to remove all soils and debris before disinfecting. Procedural emphasis has been placed on identification of high touch surfaces, disinfectant dwell times, CDC and EPA guidelines, etc.
- Provided 180 Disinfection Kits for distribution throughout campus for on-the-spot disinfection when deemed appropriate by Wilmington College staff and faculty. Each kit includes a ready to use liquid disinfectant spray with a 3-minute kill claim for COVID-19, an aerosol disinfectant spray, 32oz bottle of hand sanitizer, box of nitrile gloves, roll of wipers and pack of disposable masks. Students will be provided with a minimum of two reusable masks.
- Classrooms will be provided the disinfecting cleaner and paper towels in each classroom so desks can be cleaned between classes.
- Special note for International Students: International students will be quarantined in off campus housing for 14 days prior to the beginning of the semester or athletic participation and will be monitored by the college.

WC Health Services

Wilmington College has a campus physician on campus daily as well as a Student Health Center (SHC) and Athletic Training Clinic for athletes. The SHC will be implementing the use of telemedicine for the fall semester.

If you become ill:

- 1) call the SHC for evaluation and possible assistance with urgent care and COVID-19 testing.
- 2) After hours: call urgent care prior to going and also notify campus safety.

Notifying the Student Health Center or Campus Safety is vital in protecting the health of our campus and will allow us to better serve you. The County Health Department would like students who live within driving distance to be tested in Clinton County and then head to their home and self-isolate while awaiting results. Students who cannot do this will need to self-isolate in a designated room provided by the college. Again, they must notify SHC or Campus Safety. We will also be developing a form for the student to take with them to urgent care requesting notification of testing results be sent to the SHC.

There are three local urgent care clinics in Wilmington providing COVID assessment and care. A more comprehensive plan for quarantine/contact tracing is being developed in conjunction with the local Health Department. It will be shared with campus when it becomes finalized and available. The SHC is partnering with Greater Tomorrow Health for drive up COVID testing.

Of note, if you do become ill and go to Urgent Care, treatment may include a rapid flu and strep test and further assessment/testing for COVID-19 and care. Please notify campus safety if you go to Urgent Care. They will notify the SHC so we can follow up with you.

Local Area Urgent Care Locations Insurance or Cash/Credit

Greater Tomorrow Health HOURS: 8 a.m. to 8 p.m., 7 days a week 2107 Rombach Ave. Wilmington, Ohio 45177 Phone (937) 383-1040 X-ray services <https://greatertomorrowhealth.com/>

Athletics at Wilmington College

Our athletic conference, the Ohio Athletic Conference (OAC) has a COVID-19 Task Force. The Task Force consists of all head athletic trainers in the conference, plus two Athletics Council liaisons, and two team physicians (one from the Cleveland Clinic Sports Health Center and the other from OSU Wexner Medical Center). They have developed guidelines for athletics for the coming year that awaiting final approval. When these plans are finalized, they will be shared with the campus. These will include a several phased resocialization plan, updated daily procedures, and conference wide game-day procedures. There will be a daily screening of our athletes that will include a symptom checklist and a temperature check. More information will be forthcoming.

A Final Note for our WC Community...

The College's processes and protocols have been established with your health and well-being in mind. We're going to great lengths to ensure our facilities and fixtures are safe and clean. However, according to health organizations, the transmission of COVID-19 is most likely through direct contact with virus-laden, water droplets in the air. This places a great responsibility on each of us – students, faculty and staff – to be vigilant in practicing physical distancing and the wearing of facial coverings. We're striving to provide a safe environment in which to live and learn, each of us has a personal responsibility to ourselves and to one another to make the return to campus successful. We will continue to develop plans in accordance with the Clinton County Health Department, the Ohio Department of Health, the CDC, the Department of Education, Governor DeWine's office, the NCAA and the OAC.
